TITLE	Kansas-Training Information Program. Report on Vocational Training, Placement Rates, and Average Salaries.
INSTITUTION	Kansas State Board of Education, Topeka. Lifelong Learning Div.
PUB DATE	Jan 94
NOTE	46p.
PUB TYPE	Statistical Data (110)
EDRS PRICE	MF01/PC02 Plus Postage.
DESCRIPTORS	Community Colleges; Continuing Education; Employment; *Employment Statistics; *Enrollment; *Job Placement; Postsecondary Education; *Salaries; State Programs; State Surveys; Two Year Colleges; *Vocational Education
IDENTIFIERS	*Kansas

ABSTRACT

This report includes enrollments, placement rates, and earnings for persons completing a vocational education program within each postsecondary educational institution in Kansas. Vocational education programs included in the Kansas-Training Information Program (K-TIP) report are postsecondary programs offered by area vocational-technical schools, community colleges, Kansas College of Technology, and Washburn University. Programs are grouped by classification of instructional program clusters. Data are presented for the 12-month period July 1, 1992, through June 30, 1993, for those persons who completed a vocational program the previous year. The first table summarizes the enrollments, completer, and placement rates for each instructional program cluster. The individual local education agencies' programs follow. Each table shows the following: enrollments, completers, completers/leavers, continuing education, employed, percentage employed, average salary, and employer rating of employee job skills as very good, good, and poor. FOREWORD

This report was prepared in response to K.S.A. 72-4451 that establishes the Kansas-Training Information Program (K-TIP). As required by the statute, the State Board of Education publishes the K-TIP report each year which includes enrollments, placement rates and earnings for persons completing a vocational education program within each postsecondary educational institution.

INTRODUCTION

Vocational education programs included in the Kansas-Training Information Program (K-TIP) report are postsecondary programs offered by area vocational-technical schools, community colleges, Kansas College of Technology, and Washburn University.

The information in this report was compiled from two major sources: 1) program completers, and 2) placement and earning figures as submitted to the State Board of Education.

The programs are grouped by classification of instructional program clusters. Data is presented for the twelve-month period July 1, 1992, through June 30, 1993, for those persons who completed a vocational program the previous year.

LIMITATION OF REPORT

The figures in this report should be considered as indicators and not as an absolute for placement and/or earnings for any given program. The salaries are averages; actual individual earnings may be considerably lower or higher than those published in this document. Many other factors influence actual annual earnings; for example, average earnings will likely vary from one region of the state to another. In addition, some completers are self-employed in established, successful businesses.

PROGRAMS, PLACEMENT, AND EARNINGS

The information appearing on pages 3-38 lists the placement rate and average earnings of those placed by instructional programs. Terms used in the report are defined as follows:

Enrollments

The number of postsecondary students in a program. The students are classified as postsecondary if they have completed or left high school, are enrolled in an organized program of study for which credit is given towards an associate degree or vocational certificate.

Continuing

The number of postsecondary students who were in the program the next school year.

Completers

The combined number of persons reported as completers and leavers by the responding schools. A completer is a student who finished a planned sequence of courses, services, competencies, or activities designed to meet a vocational occupational objective.

Leavers

A vocational program enrollee who has left the program and institution without completing the program, but who left voluntarily before its formal completion with sufficient occupational preparation (workable skills) to work in the field.

Average Percent of Completers with Earnings

The data was computed by dividing the number of those defined as placed by the total number of completers and leavers. The completers who are not considered placed are primarily those whose status is unknown or who were unemployed.

Average Annual Earnings

The average earnings were calculated on an annual basis for all program completers and leavers who had reported their earnings during the preceding year.

JOB PLACEMENT AND EARNINGS OF PROGRAM COMPLETERS

The clearest way to measure the effectiveness of job placement is to look at the placement rate of program completers. While not feasible to expect a 100 percent placement rate, it certainly is desirable. The State Board of Education monitors the placement rate of vocational completers as one indicator of the effectiveness of vocational programs.

The data presented below summarize the enrollments, completer and placement rates for each instructional program cluster. According to the data, 8,778 vocational students completed a program or were employable leavers within the postsecondary institutions listed. The data also indicate that students completing vocational programs are able to secure employment at better than 84 percent (average) placement rate.

The clearest way to measure the effectiveness of job earnings is to look at the average salaries which vocational completers demand. The average annual salary figures for each cluster ranges from $11,473 to $22,006.

The individual local education agencies' programs are listed starting on page 3. Information not given to the State Board of Education has a (-) in place of a number.

ADVISORY COMMITTEE

An advisory committee was established to assist in the administration of the Kansas-Training Information Program. The seven members of the K-TIP advisory committee are represented by two members from community colleges; three members from area vocational-technical schools; and one member from a municipal university.

The advisory committee members are as follows:

Dr. Jimmie Downing, President, Barton County Community College, Great Bend

Dr. William Dunlap, Dean, School of Applied & Continuing Education, Washburn University, Topeka

Dr. Rosemary Kirby, Director, Wichita AVTS, Wichita

Mr. Eugene Lundgrin, Director, Salina AVTS, Salina

Mr. Richard McWhorter, Director, Kaw AVTS, Topeka

Dr. Dan Radakovich, Vice President, Johnson County Community College, Overland Park

Strategic Directions for Kansas Education

The Kansas State Board of Education is charged with the general supervision of public education and other educational interests in the state. While clearly acknowledging the role and importance of local control, the State Board of Education has the responsibility to provide direction and leadership for the structuring of all state educational institutions under its jurisdiction.

The beginning place for determining the mission for the Kansas State Board of Education is the assumption that all Kansas citizens must be involved in their own learning and the learning of others. It is the combined effort of family, school, and community that makes possible the development of a high quality of life. It is the parent who is the first "teacher" of children. As we grow older, we learn that the school, the workplace, and the community support our lifelong learning and our training and retraining. The Board recognizes the responsibility it holds for Kansas educational systems and promoting quality education programs. The mission for Kansas education is:

To prepare each person with the living, learning, and working skills and values necessary for caring, productive, and fulfilling participation in our evolving, global society.

We believe that the strategic directions for the structuring of Kansas education must be organized to:

- create learning communities
- develop and extend resources for parenting programs and early childhood education
- expand learner-outcome curriculum and learner-focused instruction
- provide inclusive learning environments
- strengthen involvement of business and industry in education
- provide quality staff and organizational development.
